**Health Integrated Ranks in Tampa's Top 10 Growth Companies**

**Tampa, Fla – August 2, 2010** – Health Integrated, a leading provider of Health Management Solutions for health plans, placed in the top 10 of Tampa Bay's 50 fastest growing companies ranked by dollar revenue growth from 2007 to 2009. The *Tampa Bay Business Journal* creates the annual Fast 50 listing to promote and recognize companies that are making a positive impact on Tampa's business community.

"Our growth over the last couple of years is a true testament to the tireless contributions of our talented employees and our unique approach to helping our customers solve difficult and complex healthcare business challenges," says Shan Padda, chairman and chief executive officer of Health Integrated. "I'm proud that our company is being recognized as being a valuable contributor to Tampa's business community as well as a good place to work."

The list also identifies fastest growing companies based on percent of revenue growth, in which Health Integrated ranked 23<sup>rd</sup>. Both designations require independent auditing of the Company's financial records for the past three years. Health Integrated continues to increase its health plan customer base, develop and launch new service offerings and strategically grow its employee population. Health Integrated has offices in Tampa, Lynnwood, Washington, and Pleasanton, California.

"With a solid business foundation in place, we are well position for continued growth in a rapidly changing healthcare landscape," Padda says. "As a partner to the nation' health plans, we offer health management solutions that improve the health and quality of life for health plan members while helping our customers achieve goals for clinical outcomes, quality measures and cost reduction. We look forward to continuing to demonstrate -- and be recognized for -- the value of our offerings."

Through its relationships with health plans, including plans that reach vulnerable Medicaid and Medicare memberships and leading commercial plans, Health Integrated's health management solutions currently reach more than seven million health plan members. Many of these members have complex, chronic medical conditions along with psychosocial issues, such as depression, substance misuse, lack of family support or other barriers to care.
